PROFESSIONAL SUMMARY

Highly motivated B.Tech. in Artificial Intelligence & Data Science (AI & DS) student with a passion for software development. Image classification (CNN) skilled, through a 1 month internship at DRDO. Possesses a diploma in Information technology and thrives in collaborative environments. Eager to leverage my technical expertise and teamwork abilities to contribute to a dynamic software development team.

EDUCATIONAL BACKGROUND

Vivekananda Institute of Professional Studies (GGSIP University)

New Delhi
B.Tech (AI & Data Science)
Till : 7.4 CGPA
PURSUING. (2022-2026)

DSEU DWARKA (Formerly IIT Dwarka)

New Delhi
Diploma in Information Technology
BTE Board
7.1 CGPA
COMPLETED. (2018-2021)

12th

INTERMEDIATE Board
6.4 CGPA
COMPLETED. (2017)

10th

CBSE Board
8.2 CGPA
COMPLETED. (2015)

SKILLS & STRAIGHT

Python, AI, ML, DL, Data Science, TensorFlow, NumPy, Pandas, Matplotlib, PyTorch, Scikit-learn, HTML, SQL, Data Structures and Algorithms, Docker, Git, GitHub.

HOBBIES

Listening Music
Fitness Freak
Reading Books
Travelling

EXTRA-CURRICULAR ACTIVITIES

Antarman : The Yoga & Meditation Club
Cluster : The Data Science Club

PROFESSIONAL EXPERIENCE

- 2 Months AI Engineer Intern Experience

SUMMER INTERNSHIP

- DRDO (Defence Research & Development Organisation)

Project : Image Classification Using CNN in Deep Learning.

Built and trained a CNN model with TensorFlow/Keras to classify dog and cat images and celebrity images, achieving 96% validation accuracy. Included data preprocessing, model design, and performance evaluation using real image datasets. (5 JUL 2024-5 AUG 2024)

- Systools Software Pvt. Ltd.

Project : AI Powered Crime Hotspot Detection and Early Prediction.

Built a full-stack analytics tool using Python and Streamlit that processes historical crime data to predict future crime hotspots via ML models and interactive 3D geospatial visualization with cesiumJS, enabling law enforcement agencies to proactively allocate resources and improve public safety. (1 JUL 2025-28 JUL 2025)

MACHINE LEARNING PROJECTS

- Tesco GenAI Creative Compliance Studio :

Developed an end-to-end GenAI-powered Streamlit application to automatically generate retail marketing creatives with built-in brand and compliance checks. The system integrates AI-based creative generation, background removal, value-tile creation, and an advanced compliance engine to validate promotional text and visuals, ensuring faster, compliant, and scalable content production for retail campaigns.

- NetCare+ :

It is a real-time emergency healthcare platform that integrates NOKIA Network-as-Code APIs to enable rapid medical response through intelligent network optimization and real-time patient monitoring.

- AI Powered Disaster Monitoring System :

Designed and implemented an interactive Streamlit dashboard for monitoring disaster events with historical context analysis. Integrated real-time data processing via Redis and backend APIs, visualizing live and historical data on an interactive 3D Cesium globe. Developed analytics features including geographic and mapping using Plotly and Pandas. Built auto-refresh functionality, alert systems, and filtering controls to support disaster response decision-making with live and historical insights.

- AI Analysis Personalised Career and Skills Advisor :

Developed a comprehensive AI-powered career guidance platform using Streamlit that analyzes resumes, matches candidates with relevant jobs, identifies skill gaps, and generates personalized learning plans. The system features.

EVENTS & HACKATHON

- Hackerearth : Tesco Retail Media InnovAltion Jam, in powered by Dunnhumby.
- Hackerearth : IMC Open Gateway Hackathon organised by GSMA, in partnership with NOKIA.
- Hack2Skill : GenAI Exchange Hackathon organised by GOOGLE.
- Unstop : Code Slayer 2K25 Hackathon organised by National Institute of Technology (NIT), Delhi.
